

Module Name	Problem Solving	Module code	MATH20481
--------------------	------------------------	--------------------	------------------

Please rate the module by marking one of the boxes provided. If you have indicated disagreement with a statement please offer a constructive comment for improvement in the box provided below the statement.

Key	N: Neither agree nor disagree					
SA: Strongly agree	D: Disagree	SA	A	N	D	SD
A: Agree	SD: Strongly disagree					
1. I was clear about what I was expected to learn in this module.		X				
<i>Comments:</i>						
2. The content and activities enabled me to achieve what I was expected to learn in this module.		X				
<i>Comments:</i>						
3. Assessment tasks and criteria were clear to me in this module.		X				
<i>Comments:</i>						
4. The assessments so far have helped with my learning in this module.		X				
<i>Comments:</i>						
5. The feedback I received on assessed work helped with my learning in this module.		X				
<i>Comments:</i>						
6. The range of activities that were used in this module helped with my learning.		X				
<i>Comments:</i>						
7. The module tutor(s) explained the subject clearly and I was engaged.		X				
<i>Comments:</i>						
8. The overall support and guidance I received from the tutor(s) in this module helped with my learning.		X				
<i>Comments:</i>						

Please include any additional comments in the boxes overleaf.

Additional comments:-

The quantity of group work was certainly interesting with it representing my poorest marks as opposed to the best marks for other members of my team. The fact that the 3rd assignment also coincided with another modules large group work project and a number of individual assignments meant that the work was far from evenly distributed within the team. In particular, the feedback on our presentation clearly highlighted that a certain member of the team had massively underperformed and yet the same marks were awarded across the team.

Thank you very much for your contribution. Your comments are highly valued and will help to improve the programme for future students.
